

Amendments to the Specification:

Please replace the sentence starting on line 28 of page 5 with the following sentence:
“The raising of the load-carrying unit 5 inactivates the locking means 17 between the load-carrying unit 5 and the wagon portions 10.”

Please replace the sentence starting on line 11 of page 6 with the following sentence: “In order to reduce the friction between the slide belt 35 and the slide foot 40, the slide belt 35 is preferably covered with, on the surface pointing towards the slide foot 40, or manufactured from, some kind of low friction material (e.g. ~~PolyTetraFluorEthylene~~ polytetrafluoroethylene, PTFE, which is sold under the trademark ~~Teflon~~ TEFLON®).”

Please replace the sentence starting on line 21 of page 7 with the following sentence: “As the load-carrying unit 5 has been moved back to the wagon portions 10, the load-carrying unit 5 is lowered to engage the locking means 17 that lock the load-carrying unit 5 to the wagon portions 10.”
